## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/9/03 has been entered.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Ochi et al, US Patent No. 5,416,358.

Ochi et al disclose an IC card including frame with lateral hole for infecting encapsulating resin comprising: an electronic module including an antenna coil and an integrated circuit 3 electrically connected to each other; an a hollow resin case 7 provided with a first slit 7c and a hollow portion must be inside to provide air flow, wherein the electronic circuit module is contained in the hollow resin case 7, and the first slit spatially connects an inside and an outside of the hollow resin case (see figures 1-6, 29-32; col. 8, line 1+).

Re claim 3, wherein the antenna coil and the integrated circuit are provided on a single board 2.

Art Unit: 2876

Re claim 4, the hollow resin case is formed by allowing a first part and a second part to join each other and the first slit is provided in a portion where the first part and the second part join each other (see figures 3, 4).

Re claim 5, the electronic module is positioned close to one face inside the hollow resin case and the first slit is provided in a face opposite the one face of the hollow resin case.

***Allowable Subject Matter***

4. Claims 2 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments filed 6/9/03 have been fully considered but they are not persuasive. (see examiner remarks).

**REMARKS:**

In response to the applicant's argument that Ochi et al do not disclose a hollow portion in the resin case connected the hollow portion of the IC module, the examiner respectfully disagrees. Ochi et al disclose a slit 7c on the frame of the data carrier wherein the slit is an air flow passage. Therefore, the slit must be connected to a hollow portion inside the case to allow air to flow. The applicant argument is not persuasive. Refer to the rejection above.

***Conclusion***

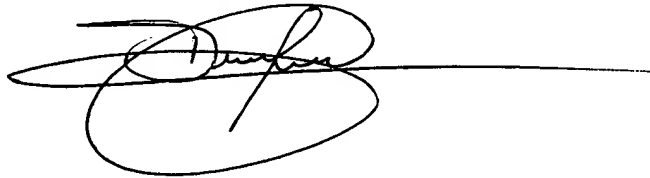

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel St.Cyr whose telephone number is 703-305-2656. The examiner can normally be reached on Mon-Fri.
